DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 5, drawn to a product, classified in class 426, subclass 596.
 - II. Claims 1-4, drawn to a process of producing a product, classified in class 426, subclass 596.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and product. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially system or by hand, or (2) the system as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the product may be prepared by a materially different process, for example, one wherein soybeans are extracted with sprayed water on a soybean bed on a perforated conveyor.
3. Because these inventions are distinct for the reasons given above and the search strategy required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1761

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
